

KITS

Turnkey Platforms for eDiscovery Success

Agility drives profits and successful outcomes for eDiscovery users. In our 15+ years of real-world eDiscovery experience, we've seen countless examples of project-based engagements (and profit margins) that suffer from long lead times, slow deployments, poor setup, and overpriced components purchased under duress. GJ Kits were conceived and purpose-built to solve these problems for legal teams and service providers. Affordable hardware, pre-configured systems, seamless global deployments, and 24/7/365 proactive management and support, all at your fingertips. Our on-demand tech stacks and industry-specific expertise allow you to focus on your core business while your team hits the ground running.

KEY BENEFITS

Speed & Agility

On-demand global deployments and rapid recoveries to stay on schedule and meet deadlines.

Confidence & Control

We are your turnkey supplier for hardware, setup and management. No more vendor juggling.

Expert Guidance

24/7/365 support and 15+ years of expertise at your disposal, from design to decommissioning.

Transparent Costs

Save money! Only pay for what you need through predictable purchase, rental, and dormancy models.

The GJ Kit Collection

GeorgeJon "Kits" are synchronized platforms of hardware, software, and managed services, available in both on-premises and hosted environments, that are specifically designed to provide optimized functionality and proven performance.

GJ Agnostic Cloud Kit

GJ can deploy blocks for every application solution in a cloud-based environment, regardless of the preferred hosting provider (AWS, GCP, Azure). Every layer of the deployment, from storage to SQL to applications, is virtualized in the public cloud.

GJ Enterprise Kit

The pinnacle of performance and flexibility, Enterprise Kits are the global on-prem standard. You will never outgrow the system or need to replace it, as you can start small and grow as needs and budgets dictate. We can build Enterprise Kits to match any requirement, size, environment, or tier.

GJ Appliance

Our most popular offering for project-based deployments requiring multiple apps. Quickly scales from 7TB up to 24.5TB in 3.5TB increments. Supports Tier 1 or 2 Relativity plus additional eDiscovery applications. Integrated backups on separate media. Rack mount or desktop installations.

GJ Laptop Kit (Gen3)

The Laptop Kit delivers flexible workflow options for users on the go. Ideal for datasets under 1TB, the Laptop supports 5-10 reviewers and processing with integrated backups on separate media. Pair with our Drive Recycler for quick re-imaging to prepare it for the next engagement.

GJ Kits: Lifecycle Overview

From design and delivery to management and retirement, we have developed a turnkey Kit lifecycle program that ensures you never lose an engagement or profits due to timeline constraints. GeorgeJon manages every step of the process, delivering peace of mind and successful outcomes.

DESIGN & PREPARE

- **Quantify needs.** We map out performance specifications, security standards, software needs, and logistics constraints.
- **Present options.** You select the GJ Kit that meets your application and storage capacity requirements.
- **Define deliverables.** We define clear timelines and success metrics to ensure a seamless playbook for future deployments.

Need a quick and reliable deployment? We already have a proven roadmap and affordable resources ready for you.

BUILD & DELIVER

- **Gather hardware.** Upon your order, we provision and assemble all hardware.
- **Build and optimize.** We load your application stack, test and optimize performance, and implement security patches / configurations.
- **Ship to destination.** We'll ship your GJ Kit anywhere -- across town or across the globe -- handling all customs and logistics.
- **Install and launch.** We manage Kit installation and launch so you're fully operational and on schedule.

GJ Kits are turnkey. No guesswork, no delays, simply plug and play. Never again lose an engagement or profits due to timeline constraints!

ACTIVE MANAGEMENT

- **24/7/365 monitoring.** Our engineers remotely monitor performance, security, and workflow, ensuring optimized performance.
- **Proactive support.** We eliminate issues before they affect users: patches, updates, preventative maintenance, and much more.
- **Application assistance.** Our application experts are available to address and resolve any issues with your eDiscovery stack.
- **Scalable resources.** GJ Kits scale on demand. Require more storage or new configs mid-case? No problem.

Once your GJ Kit is deployed, our expert engineers provide proactive management and ongoing support for seamless operations that deliver confidence and results.

RECOVER & REFRESH

- **Secure shutdown:** Once the engagement ends, we confirm final backups and coordinate project closeout.
- **Safe return:** We handle reverse shipping and securely store your Kit.
- **Data wiping and destruction:** We re-image/destroy drives per requirements.
- **Dormancy pricing:** We can hold your Kit in secure storage for future use at a reduced monthly rate.

Our secure decommissioning process ensures confident closeouts and data security. What's next?

Ready to simplify your eDiscovery deployments and never again lose an engagement due to hardware delays? Let's talk!
